The heart of multi-modal logistics: Darmstadt Railport

Delivering solutions.

Darmstadt Railport: Intelligent solutions for rail and more

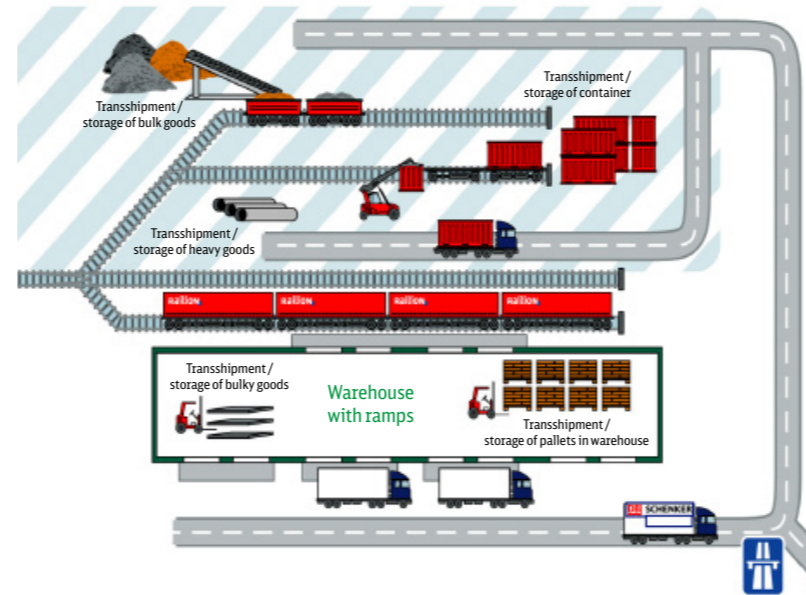

A Railport enables an intelligent logistic solution that combines both road and rail services. DB Schenker Rail uses around 40 multi-modal rail logistics centres across Europe.

The Railport Darmstadt is one of the leading rail logistics centres in Europe. Our aim at the heart of the European flow of goods is: to offer efficient, reliable and environmentally friendly rail transport to companies, without the need of having their own private siding.

Thanks to our wide variety of additional services, such as warehouse logistics, we offer top-quality comprehensive packages – for a wide range of goods. The facilities in Darmstadt have years of experience and specialized equipment to meet the steel and paper industries logistic needs.

Efficient transshipment – professional storage

The DB Schenker Darmstadt Railport is perfect for sending and receiving goods whether or not you have your own siding. The Railport also has the facilities to handle your transshipment and pre- and onward carriage needs. We also provide warehousing and inventory management services.

Core services:

- Road/rail transshipment
- Organisation of pre- and onward carriage by road

Additional services:

- Buffering and warehousing
- Picking
- Inventory control
- Inventory management
- Quality control
- Customs clearance

Special services for paper logistics:

- Delivery and professional unloading of paper rolls
- Management of paper storage including: inventory accounting, monitoring and control
- Just-in-time supply of production process and deadline control, rapid response time from order to delivery
- Special delivery vehicles
