

**Steel Logistics Center
in Hagen –
the Heart of Steel Logistics**

The power to deliver – a convincing argument

Ready for the challenges of future-oriented logistics

The Steel Logistics Center Hagen is an important facility that makes it possible for the business unit DB Cargo to respond with even greater flexibility to the sensitive logistics processes in the metals and mining industry.

On an area measuring 8,500 m² we offer you a coil logistics and transshipment system that meets the highest technological standards. As a result, we can facilitate the integrated planning of your transportation operations while offering you a varied range of supplementary services. This process-oriented innovation makes it possible for you to supply your customers on a just-in-time basis and to compensate for fluctuations in demand quickly and as required.

Customer focus

We are always ready to listen to your input and will be happy to offer you customized solutions that meet your requirements. We enjoy a challenge!

Aim

To close the gap in supply chain management for the steel industry and its customers
