

## Fast, easy, environmentally friendly: eInvoice

Dear Sir or Madam,

Do you know about DB Cargo's eInvoice system? This paperless invoice is sent electronically, making it faster and easier for you and our other business partners to process upon receipt. You receive an eInvoice, either by e-mail or via the SFTP server, just one day after billing. This saves you time and is also kinder to the environment.

### An overview of the benefits:

- No time is wasted on posting
- Invoices no longer need to be scanned upon receipt
- More time for checking invoices
- Consumption of fewer natural resources

Depending on your internal processes, you can select XML or PDF (with CSV if desired) as the format for your eInvoices.

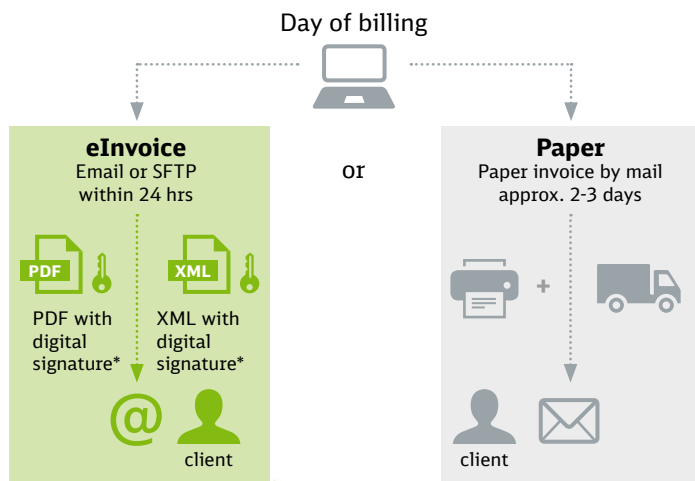

### Your five options:

- Invoice as PDF with embedded signature\*
- Invoice as PDF with embedded signature\* and additional XML data
- Invoice as PDF with signature\* and additional CSV
- Invoice as XML data with attached signature\*
- Invoice as XML data with attached signature\* and additional PDF file

\* It is possible to dispense with the signature if desired

In addition, DB Cargo will continue to supply customers with traditional, paper-based invoices.

### Different methods of receiving invoices:

If you have any questions about the eInvoice system, simply get in touch with your DB Cargo contact, or send an e-mail to the following address:
