## Our transport solutions for fertiliser and agricultural products

Case  
Fertilisers and  
Agriculture

© Deutsche Bahn AG

### Individual and environmentally friendly transport solutions

We offer you our fleet of special freight wagons, which can be adapted to your various product requirements. Depending on your needs, we will transport your products by single freight wagon or block train. Furthermore, we will ensure that your freight reaches its destination even if you do not have your own rail connection.

#### What we offer you

**Many years of experience** and the **right equipment** to safely switch all types of industrial fertiliser to rail in an environmentally friendly manner.

**Extensive knowledge of the industry**, including knowledge of NPK, KAS, AN, AS, ASS and UREA because we work with these every day.

**A one-stop shop for entire supply chain planning**, adjusted to your point of departure and point of destination, and to the transport volumes that you require. To this end, we work closely with an extremely reliable and highly experienced partner network.

Agreed and binding **quality and punctuality** for the producer, customer and goods recipient.

**Your contact person:** Philipp Sternberg, Masurenallee 33, 47055 Duisburg, Germany, Phone: +49 (0)203 3017 2536, philipp.sternberg@deutschebahn.com
