Fertilizers and salts

**Especially
for corrosive
cargo**

Customized and environmentally friendly transportation

- We offer you a fleet of specialised wagons tailored to the needs of your products. Depending on your requirements, we use block trains or the single wagonload network.
- With a broad network of partners, we realize national and international transports and take into account both natural and seasonal fluctuations.

What we offer you

Knowledge

Extensive experience and the right equipment to transport fertilizers and salt reliably.

Coordination

Management of national and cross-border runs from a single source.

Conception

Complete supply chain planning – adapted to start and destination points as well as the desired transport quantities – in cooperation with partner networks.

Monitoring

Supervision of transport execution and proactive customer information by telephone, e-mail or the Link2Rail customer portal.
