transports**

## Sustainable rail-based solutions for the building materials industry

### Task

#### Sustainable transportation

to reduce Co<sup>2</sup> emissions through the use of modern bi-mode locomotives and alternative fuels (HVO)

#### High reliability

for a smooth production process and flexibility with fluctuating volumes

#### Special equipment

for cross-modal transportation concepts

### Solution

#### Block train and single wagon transports

with strong partners Europe-wide

#### Offers of plant shunting services

enable comprehensive coordination and more efficient dovetailing of logistics processes

#### Hazardous goods expertise

for the development and implementation of concepts for CO<sup>2</sup> transportation

### Customer benefit

#### CO<sub>2</sub> reduction

of customers is achieved

#### logistics provider

for all inbound and outbound rail transports throughout Europe
