

Cargo

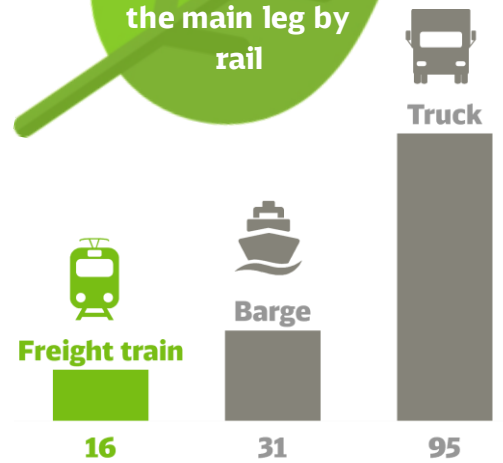

DB Cargo BTT

Intermodal chemical logistics with DB Cargo BTT

Up to 80% less CO2 emitted with the main leg by rail

Reimagining combined transport

- Over 30 years of experience as a freight forwarder and in combined transport
- Efficiently linking all modes of transport
- Connecting key chemical regions with transshipment terminals
- Competitive CT solutions even for short distances
- Current and new plant terminals integrated into our logistics concepts
- Annual certificates for the CO2 you save from rail transport
- Supporting your goals for the climate and the circular economy

Greenhouse gas emissions (CO2e) in grams per tonne-kilometer (tkm) in Germany

Our expertise is your advantage

Container transports for chemical goods

- Europe-wide transport in your tank containers or ours
- 700 modern tank containers for base and specialist chemical products (e.g. isocyanates, epichlorohydrin, hydrogen peroxide, ammonia)
- Door-to-door transport as needed taking into account your specific requirements

We invest in technical innovations

- Development of a rail-capable MEGC for hydrogen transport
- Investment in large containers for the chemicals industry
- Development of special containers for particularly sensitive dangerous goods
