

Tailor-made logistics concepts for construction sites

Special transport of 56-metre-long reinforcing steel girders for construction of a parcel handling centre

TASK

Just-in-time transport of reinforcing steel girders to construction site

Detailed load scheduling and close coordination with other service partners

SOLUTION

Transport as block train in around 6 hours

Use of specially made **flatbed turntables**

Only **short onward carriage** to construction site by truck

CUSTOMER VALUE

Affordable and environmentally friendly solution

Lower CO₂ emissions than with transport entirely by truck

Greater radius of action for customers thanks to long-distance rail transport
